After much deliberation, we have aligned ourselves with MoneySupermarket.com to deliver the greatest savings on your fuel bills. [Energy Comparison click here](#)

Under pressure from the Russian state owned monopoly Gazprom, we are suffering major price increases in our energy costs.

Luckily, after the de-nationalisation of the utility companies, competition was opened up in the UK, and energy suppliers were allowed to compete with each other for your business.

Although the small operators have been squeezed out of the market, there still remains an element of competition amongst the big 6.

As fuel prices continue to spiral, the easiest way of reducing your gas and electricity costs immediately, is by switching suppliers. There are a number of UK based switching operators, and we have checked them all out, we are now proud to announce the winner, MoneySupermarket.com.

MoneySupermarkets switching procedure is bolstered by accreditation to the EnergyWatch confidence code, thereby ensuring complete customer satisfaction throughout the process.

We hope you are as impressed as we are by the service, please, [click here to compare energy costs](#)
